

# CABLE WEIGHT MINI Installation Instructions

**WARNING: Cable Weight not for use in potable water.**

1. Place the cord through cable weight as shown in Figure A.
2. Locate cable weight at desired activation level. Lock position of cable weight by turning lid counter clockwise.  
Note: If position adjustment is needed, push down on lid and turn clockwise to loosen.
3. Wire switch as according to switch installation instructions.
4. Check installation. Allow system to cycle to insure proper operation. Be sure float has free range of motion and does not touch anything.
