

# DUAL POWER PANEL

## Duplex Panel with Generator Receptacle

Offered exclusively through our **Build-A-Panel™ PLUS** program, the **Dual Power Panel (DPP)** provides a reliable means of controlling two 208 or 240V single phase pumps by utilizing main power or generator power. IEC magnetic motor contactors are used to turn the pumps on and off. This panel comes standard as a four float circuit (floats included for stop, start, alarm, and lag). Standard components are used allowing for **fast quoting, quick build-to-ship times** and **easy troubleshooting and service**.

The Dual Power Panel is **UL/cUL listed** and backed by a **two-year** limited warranty.

### COMPONENTS

1. NEMA 4X fiberglass lockable enclosure for indoor/outdoor use
2. Red alarm beacon
3. Inner door provides added safety
4. IEC magnetic contactors with overload relay
5. Main circuit breaker
6. Generator circuit breaker
7. 60 Amp generator receptacle
8. Pump circuit breakers
9. Control/alarm circuit breaker
10. Lightning arrestor
11. Alternating relay
12. Seal fail relay
13. Control relays
14. Under voltage relay
15. Raised terminal blocks are mounted at 45° angle for easy wiring
16. Ground lugs
17. Heavy duty 22mm switches and indicators
18. 15 Amp utility GCFI receptacle
