

TANK ALERT® AB DUO

Indoor Duo Alarm System

The **Tank Alert® AB DUO** indoor alarm monitors **two liquid level conditions in one easy-to-install alarm** in lift pump chambers, sump pump basins, holding tanks, sewage, agricultural, filters and other waste applications.

The sleek design of the alarm features a user friendly touch pad with **colored LED indicators** for easy visual detection. The alarm horn and **red LED** indicator activate for a high water alarm condition. The alarm horn and **yellow LED** indicator activate for alarm 2. The **green LED** indicates 120V primary power to the alarm. Once the condition is cleared, the alarm automatically resets.
