VARIOSPEED® 3R Duplex Control Panel

Variable Frequency Drive controller in a NEMA 3R enclosure for indoor or outdoor use.

The VARIOspeed® 3R control panel is designed to control (2) three phase pumps in constant pressure control applications including booster pump, deep well submersible pump, and irrigation pump applications.

As flow and head conditions change in the pumping system, the VFDs are able to automatically control the pump speed and maintain a constant discharge pressure. The desired set pressure is entered on the display inside the panel. The pressure transducer measures the pump discharge pressure. Not for use with sewage pumps.

VARIOSPEED® 3R PANEL COMPONENTS

1. Enclosure measures 24” x 20” x 8” (61 x 51 x 21 cm) (up to 5hp) and 30” x 24” x 10” (72 x 61 x 26 cm) (7.5 to 20hp) steel NEMA 3R for indoor or outdoor use.
2. Vents for VFD cooling.
3. Fan and Thermostat for 7.5 HP and larger HP models.
4. Raised Terminals for easy field connections.
5. Circuit Breaker Disconnects
6. Variable Frequency Drives
7. Fan Control Circuit Breaker (240V models only)
8. Control Transformer (480V models only - not shown)
9. Externally mounted run indicator LEDs
10. Externally mounted Pump Hand-Off-Auto selector switches

DISPLAY FEATURES

11. 4 Line / 20 character display
12. Rotary/Push button for menu navigation and editing
13. Left Arrow button
14. ESC button
15. Run indicator LEDs
16. Fault indicator LED

FEATURES

- Run Dry protection (pipe burst or run dry protection)
- High Pressure protection
- System Fault Log
- Entire control system (panel and sensor) is UL Listed to meet and/or exceed industry safety standards
- Dual safety certification for the United States and Canada
- Standard package includes a 0-200 PSI pressure transducer
- Five-year limited warranty
- One-year limited warranty on pressure transducer

SPECIFICATIONS

POWER: Available HP range
(208V-240V) 1.5HP - 20HP
(480V) 3HP - 20HP

CONTROL:
- PID control
- Adjustable electronic overload
- Auto Start on pressure drop (adjustable)
- Auto Stop on low Hz (No-Flow / sleep mode)

PRESSURE TRANSDUCER: 0-200 PSI
(included) 1/4” NPT Male, NEMA 4X rated with 20 ft cable

ENVIRONMENTAL:
- Operating temperature: 14°F to 104°F (-10°C to 40°C)
- Storage temperature: 4°F to 131°F (-20°C to 55°C)
- Altitude: Maximum of 3280 ft (1000m) above sea level

## SELECTING THE CORRECT VFD

1. Determine the voltage available on site.
2. Select a pump with the same voltage (motor must be 3 phase).
3. Check pump motor nameplate Full Load Amps (FLA) for proper VFD sizing.
4. Select a VFD with an output amp rating higher than motor FLA.
5. Use motor Service Factor Amps (SFA) for submersible well pump applications for VFD sizing.

### PHASE CONVERSION*

It is possible to supply single phase 240V input power to VS23 models. The VFD output amp must be derated by 50%.

Example: The VS23-45.0-N3R will be derated to 22.5A output (max).

*Use three-phase input power if available. VS23 VFD’s are not UL listed with single-phase supply. Always use a 3 phase motor.

### MAXIMUM MOTOR CABLE LENGTHS

For 208V-240V pumps: 400 ft. For cable lengths greater than 400 ft., use a load reactor. Do not exceed 800 ft.

For 480V pumps: 50 ft. For cable lengths greater than 50 ft., use a load reactor. Do not exceed 300 ft.
