

FRUSTRATED WITH PUMP AND CAPACITOR FAILURES?

WE HAVE THE SOLUTION!

NEX Series® Grinder Control Panel

Single Phase Grinder Pump Control

The next generation grinder pump control solution that offers advanced functionality and pump protection.

Problems

- Clogged pumps causing **pump failure**?
- Level sensing failure causing **downtime**?
- Lift station maintenance turning into **pump replacement**?
- **No pump protection**?
- **Limited data** slowing down troubleshooting?

Solution

The **NEX Series® Grinder** has the ability to monitor amperage, which can stop the pump before causing damage to capacitors or the pump.

The ability to monitor float switch and level transmitter status limits downtime.

An easy to read LCD screen makes it quick and simple to view the system status and performance.

Results

- + **Protecting the pump** saves costly repairs.
- + **Redundancy in level sensing** keeps the lift station operating.
- + **Operating flexibility** utilizing transmitter or float switch based control.
- + Provides the ability to **troubleshoot pump** and level sensing issues **before the pump is damaged**.
- + Allows **oversight** into the status of pump and level control.
